15mm
Thick!

ULTRA SLEEK VORTEX 12

The Ultra Sleek Vortex 12 is a unique 120mm fan that is only 15mm thick! This thinner design helps to free up RAM slots and allows installation in smaller spaces.

The USV 12 is not only thin, but also offers superb performance. It provides outstanding static pressure, making it an excellent choice for water coolers and other radiators with narrow fin spacing!

■ Features:

- 17 bladed fan specially engineered to provide high static pressure and wind volume while reducing noise.
- Only 15 mm thick! Allows the USV Fan to be installed in smaller spaces that 25 mm fans won't fit!
- Variable fan speed from 400 to 1300 RPM with PWM.
- Light weight, reducing stress on boards already burdened with heavy heatsinks!
- Especially suited for Home Theater PCs and smaller cases, where excellent cooling ability and quiet operation is desired.

■ Specification

-Size : 120 x 120 x 15mm	-Airflow : 56 CFM	-Rated Current : 0.12 Max. Amp
-Bearing : Double Ball Bearing	-Static Pressure : 0.9 mmH2O	-Input Power : 1.44 W
-Weight : 91 g	-Connectors : 4 PIN PWM	-Input Current : 0.12 Max. Amp
-Fan Speed : PWM 400 ~ 1300 RPM	-Rated Voltage : 12 V	-MTBF : 100,000 h / 35 C or 60,000 h / 60 C
-Noise : 7~17 dBA
